## **BAF Technologies, Inc. Appoints Clean Vehicle Solutions, LLC as the Authorized Small Volume Manufacturer of Compressed Natural Gas Vehicles in the North East Region using the BAF CalComp System™**

Companies also Establish Joint Marketing Agreement to Develop Northeast Corridor Natural Gas Fleet Market.

Clean Vehicle Solutions, LLC, a small vehicle manufacturer and BAF Technologies, Inc. have entered a joint agreement to drive installations of BAF CalComp natural gas (CNG) systems through Clean Vehicle Solutions small vehicle manufacturing facility in New Jersey.

In addition to the production of EPA and CARB certified alternative fuel systems and light, medium, and heavy duty vehicles, that qualify for federal tax credits, the BAF and CVS joint marketing agreement further expands a sustainable solution that will reduce both costs and impact on the environment in an important market for both companies.

Clean Vehicle Solutions is now the authorized small vehicle manufacturer of CNG vehicles using BAF CNG systems in the Northeast, and both companies will leverage their years of management experience in natural gas, vehicle manufacturing, and technology innovation to meet the increasing demand for alternative solutions for economical, sustainable solutions from corporate, commercial, and municipal fleets.

"Our joint marketing agreement will expand compressed natural gas vehicle solutions for fleets in the Northeast corridor, from Maine to Virginia, during an important growth period for alternative fuel vehicles." said John Bacon, president of BAF.

"As natural gas vehicles become more important to corporate, commercial, and municipal fleets, this agreement will further facilitate access and availability to the necessary technology and the infrastructure to support the growth in the industry." said Pat Charla, marketing director of Clean Vehicle Solutions.

### **About BAF**

**BAF Technologies, Inc.** is the premier provider of natural gas vehicles in the United States. Founded in 1992, and headquartered in Dallas, the company supports global clients with vehicle conversions, alternative fuel systems, application engineering, service and warranty support as well as research and development. For nearly 20 years, BAF has been the leader in conversions and systems integration for niche markets within the AFV industry.
